

Boston Engineering simulates swimming robot action 60% faster with PTC Solutions

As an outsourced engineering services firm, Boston Engineering offers turnkey electrical, mechanical, software, and controls engineering development services for clients in industries such as electronics, medical, defense/homeland security, energy and environment, manufacturing, and robotics.

“By using PTC Creo and PTC Creo Simulate, we’ve cut time to run simulations by 60%. In fact, with larger assemblies, we can now run simulations that we could not with our previous system.”

Will Ober, Mechanical Engineer
