

## Intel Cuts Task Time Up To 17x With PTC Creo

Intel is a world leader in computing innovation. The company designs and builds the essential technologies that serve as the foundation for the world's computing devices.

"As we work with multiple groups, we have to incorporate CAD data from multiple CAD systems. With PTC Creo, we can read and modify those files directly in our system, and it's definitely a quicker approach.

Many of the features that come with PTC Creo save Intel time and money. For example, use of lightweight graphics reduce the time it takes to work with large assemblies from minutes to seconds."

Glen Hanna,  
System Platform Architect, Intel
