

## Lenovo Designs Innovative Workstations Using PTC Creo

Lenovo is one of the world's leading personal technology companies, producing innovative PCs and mobile internet devices. A global Fortune 500 company, Lenovo is the world's largest PC vendor and fourth largest smartphone company.

"Lenovo has always focused on innovation meaning determining the best design options are critical. The workstation design team uses PTC Creo for all concepts and design work. I use PTC Creo and find that large files open faster allowing me to quickly review designs models and provide feedback.

We also use PTC Windchill as our defect-tracking system and data repository. Both tools have definitely helped us to be more efficient global communicators and collaborators."
